

Washington Coalition of
Sexual Assault Programs

Presents

Promoting Healing in Foster Care and Adoption with Dr. Wayne Duehn

Monday, June 2, 2008

**EVERETT EVENTS CENTER
EVERETT, WASHINGTON**

ABOUT THE PRESENTER:

Wayne D. Duehn, Ph.D. is a Professor in the School of Social Work at the University of Texas at Arlington. He has considerable experience in working with adoptive and foster care professionals (and families) in both the public and private sectors.

Dr. Duehn has conducted state-wide training workshops for adoption/foster care personnel throughout North America. He serves as ongoing consultant/trainer to adoptive personnel and foster home developers of Casey Family Programs, Neighbor to Family Programs, and the Louisiana and Texas Departments of Child Protective Services. He is a co-author of *"Beyond sexual abuse; The healing power of adoptive families"* which is an outgrowth of an ongoing educational program of The Three Rivers Adoptive Council, Pittsburgh, PA.

As a national lecturer and trainer, Dr. Duehn is also consultant to many institutions. He earned his Master's degree in Social Work from Loyola University, Chicago, and holds a Ph.D. degree in Psychology and Social Work from Washington University, St. Louis.

ABOUT THIS TRAINING:

Promoting Healing in Foster Care and Adoption is a workshop intended for therapists providing support to parents whose foster or adoptive children may have been sexually abused.

Current estimates of sexual abuse among children in placement range from 75 to 85 percent. Given the high incidence of sexual abuse among children who are entering placement, it is imperative that professionals and foster/adoptive families understand the facts of abuse as well as their respective roles in the healing process. Equally important is the individual's level of comfort in discussing sexual abuse and normal sexual issues.

This workshop will specifically focus on developing professionals who can teach the skills and techniques required to parent a child victim of sexual abuse and to develop foster/adoptive parents who are proficient in these parenting skills. When such skills are learned, knowing parents can make the most crucial difference for a child recovering from the trauma of sexual abuse.
